[Al - ToxFAQs.pdf](#)

Charlene and Tony,

Here are two examples of the attachments for the residential packets for review – one indoor+outdoor cleanup property [Ex. 6 - Personal Privacy](#) and one outdoor-only [Ex. 6 - Personal Privacy](#)

We do not have copies of the ServPro indoor cleaning reports yet, right now there is a placeholder for Attachment 6 included at the end of the [Ex. 6 - Personal Privacy](#) packet. We are working with ServePro to finalize a demo of what that would look like.

Please review attachment 2 – it is a summary of the metals toxicological information, which would need to be translated, if we sent out. The alternative is to provide the full document (ToxFAQ). I have included one ToxFAQ (for Aluminum) in this email, along with its Spanish translation. While it would be easier just to include the ToxFAQ, it would make the packages much larger, since it would be for 18 metals – 4 pages each (vs 2 pages). Let me know which we should go with, the summary or the ToxFAQ.

Also, please send me any other comments you have so we can finalize these attachments.

Thanks,

Michelle
